When it comes to evolution, the old-earth creationists are split. Some believe that God used evolutionary principles to develop life (Theistic Evolution). Others do not believe in evolution, instead opting for the belief that each life form was a unique creation by God, as evidenced by the fact that there are no “missing link” fossils for all species (Progressive Creationism).

Answers In Creation’s ministry is to aid the old-earth believer, no matter what form of creation they believe in. I am a progressive creationist. However, I recognize the possibility of theistic evolution. As always, there is an open invitation to any theistic evolutionist to submit material to Answers In Creation. If you would like to provide the rebuttal for this chapter, please contact me.
